About Extracta

Extracta is an innovative Australian company that transforms agricultural by-products into high value, clean label bioactive ingredients.

Our pioneering processes allow us to reclaim active nutrients from agricultural crops right where they are grown. Our products retain and capture all available vitamins and nutrients, and are naturally high in polyphenols, antioxidants, minerals and essential amino acids.

Our innovative approach creates ingredients that can easily be added into commercial foods and beverages, animal feeds, and pharmaceutical, nutraceutical and cosmeceutical products.

We are safeguarding Australian grown produce and putting it to the highest use, contributing to the sustainability of the Australian agricultural sector.

With over 20 years of research and food production expertise from our dedicated team, you know you are getting the best quality sustainable products you can trust.

Products

Extracta creates a wide range of high-quality, nutritious ingredients for the nutraceutical, food, animal health and cosmetic industries from a variety of agricultural by-products using natural manufacturing methods.

Our products include:

- Extracta Sugarcane Fibre (MediKane Certified) – natural broad spectrum prebiotic fibre
- Extracta White Grape Fibre – whole grape high activity superfood powder
- Extracta Red Grape Fibre – whole grape high activity superfood powder
- Extracta Apple Fibre – whole apple high activity superfood powder

In time, Extracta will extend its product offering to provide highly nutritious products made from avocados, stone fruits, mangoes, soy, watermelons, berries and more.

Our ingredients will help give your products and consumers the nutritious boost they need.

Our Process

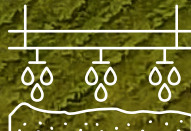

Producer grows and harvests the crop

Top quality produce is processed and sold

Extracta recovers the leftover pomace (husks, skins etc)

Pomace is cleaned using a chemical free process

Pomace is dried naturally using solar

Pomace is milled into powder ready for use

Get in touch for more information about our products and to discuss the best solution for your company.
