

What are alternatives to ScienceLogic?

You shouldn't expect to find a universal Network Management Software solution. A popular service such as ScienceLogic might have great functionalities but still not fit into your commercial standards. To find ideal ScienceLogic alternatives, do a comparison the benefits of different tools offered by competitors that are listed below. It's even better if you compare them against each other to find the most advantageous deal.

Our team of experts have evaluated ScienceLogic with a total score of 7.9/10 after a period of thorough tests. Actual customers of ScienceLogic have an average satisfaction rating with the product at 100% which reflects their experience with this application. If you spend some time comparing other ScienceLogic alternatives you will definitely find other services with similar or possibly better ratings.

TOP ScienceLogic Alternatives

1. Atera

Our score: 9.0 User satisfaction: 100%

Atera brings the entire IT business together by its unique combination of RMM, remote control, and PSA in one system. This innovative network management solution is capable of remotely monitoring an unlimited number of servers and workstations, as well as powerful ticketing and customer satisfaction surveying and billing and invoicing.

2. NetFlow Analyzer

Our score: 9.6 User satisfaction: 95%

A complete network bandwidth and traffic analytics solution that provides companies with visibility into their bandwidth and traffic utilization and helps them optimize network performance. NetFlow Analyzer also comes with a reliable security threat detection and isolation feature and a mobile-based application for monitoring your network's status remotely.

3. PagerDuty

Our score: 8.9 User satisfaction: 97%

An incident management platform that provides reliable incident notifications via email, push, SMS, and phone. It also enables automatic escalations, on-call scheduling, and other functionality to help teams detect and fix infrastructure problems quickly. PagerDuty leverages machine learning in aggregating and correlating events and turning them into actionable alerts.
